**TEAPOT**

Tea is an aromatic beverage prepared by pouring hot or boiling water over cured or fresh leaves of *Camellia sinensis*, an evergreen shrub native to East Asia which probably originated in the borderlands of southwestern China and northern Myanmar.

Tea is also made rarely from the leaves of *Camellia taliensis*. After plain water, tea is the most widely consumed drink in the world. There are many different types of tea; some have a cooling, slightly bitter, and astringent flavor, while others have pro-

Tea plants are native to East Asia and the probable center of origin of tea is near the source of the Irrawaddy River from where it spread out fan-wise into southeast China. In-

The etymology of the various words for tea reflects the history of transmission of tea drinking culture and trade from China to countries around the world. Nearly all of the words for tea worldwide fall into three broad groups: te, cha and chai, present in English as tea, cha or char, and chai. The earliest of the three to enter English is cha, which came in the 1590s via the Portuguese, who traded in Macao and picked up the Cantonese pronunciation of the word. The more common tea form arrived in the 17th century via the Dutch, who acquired it either indirectly from the Malay (teh), or directly from the tè pronunciation in Min Chinese.

The term herbal tea refers to drinks not made from *Camellia sinensis*. They are the infusions of fruit, flowers or other plant parts, such as slices of rosehip, chamomile, or mint leaves. These may be called tisanes or herbal infusions to prevent confusion with the tea made from the tea.

**HERBAL**

First originating in China, the beverage's name there is hong cha (Chinese: "red tea") due to the color of the oxidized leaves when processed appropriately. Today, the drink is widespread throughout East and Southeast Asia, both

in consumption and harvesting, including in China, Japan, Korea and Singapore. Similar variants are also available in South Asian countries.

**TEA IS THE BEST DRINK**

## LETTERFORMS

Black tea (also literally translated as red tea from various East Asian languages) is a type of tea that is more oxidized than oolong, yellow, white and green teas. Black tea is generally stronger in flavour than other teas. All five types are made from leaves of the shrub (or small tree) *Camellia sinensis*, though *Camellia taliensis* is also used rarely. Chinese variety plant for most other types teaste the large-leaved Assamese plant which was traditionally mainly used for black tea
